Viransh Shah

B.A.Sc. Computer Science — McMaster University 2026

viranshshah@gmail.com | shahviransh.github.io | linkedin.com/viransh-shah | github.com/shahviransh

Highlights of Qualifications

- Full stack developer and June 2026 computer science graduate with 12 months of federal co-op experience taking a desktop and web application from prototype to production, covering database design, REST APIs, packaging, and deployment.
- Builds across the stack in Python, TypeScript, Vue.js, and React Native, with CI/CD through GitHub Actions and cloud deployment on Azure.
- Security-minded: A+ standing in Information Security and Computer Networks & Security, the TryHackMe Pre Security and Cyber Security 101 paths, and a 2nd-place national finish at CyberSci 2025.

Education

McMaster University Sept 2021 – June 2026

Bachelor of Applied Science in Computer Science, Minor in Statistics *Hamilton, Ontario*

- Dean's Honours List (GPA 3.7 / 4.0); A+ in Databases, Data Structures & Algorithms, Information Security, and Computer Networks & Security.

Experience

Environment and Climate Change Canada & Canada Water Agency Sept 2024 – Aug 2025

Full Stack Developer - IMWEBs Viewer & Nutri View *Burlington & North York, Ontario*

- Sole developer of the IMWEBs Viewer/Nutri View from prototype to production: a cross-platform desktop and web app (Vue.js, Tauri, Flask) that visualizes watershed and water quality data through interactive tables, graphs, and maps, giving federal scientists self-serve access to specialist analysis.
- Cut analyst data prep from hours of manual work to zero with pipelines that converted Excel BMP and water quality data into SQLite and merged shapefiles/rasters into GeoPackages.
- Configured Flask REST APIs behind the Vue.js frontend, shipped signed Windows, macOS, and Linux builds from one codebase via GitHub Actions, and deployed on Azure VMs through IIS over HTTPS with a reverse proxy (ECCC-IMWEBs-Viewer, Nutri-View).

McMaster University Jan–Apr 2024, Sep–Dec 2025, Jan–Apr 2026

Teaching Assistant - SFWRENG 2C03, 2XC3 & COMPSCI 1XD3 *Hamilton, Ontario*

- Led labs and tutorials for 100+ students over three terms on algorithms, data structures, and software development in Linux, Git, C, and web stacks (HTML/CSS/JavaScript/PHP).

McMaster Cyber Society Sept 2023 – Present

Founding Executive Member *Hamilton, Ontario*

- Placed **3rd** as MacHackers at **CyberSci Regional Finals 2025** and **2nd** in Toronto against top Canadian university teams (photo), and competes in CTFs across cryptography, web exploitation, forensics, and binary exploitation.

Projects

Slicc | *Bill Splitting and Restaurant Recommendation App* | GitHub Sept 2025 – Apr 2026

- Cross-platform mobile app (React Native, Expo, TypeScript, Firebase) that helps groups split bills and discover restaurants, built by a 7-person Agile capstone team and released to Android via APK.
- Built a When2Meet-style group scheduler inside the chat that surfaces shared free times, plus event creation and expense-splitting workflows.
- Architected libsodium/NaCl end-to-end encryption so message contents stay readable only to participants, never to the server or Firebase backend.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, C, SQL, PHP, Bash, PowerShell, HTML/CSS, LaTeX
Frameworks & Libraries: Vue.js React.js, React Native, Expo, Flask, FastAPI, Tailwind CSS, Electron, Tauri, Firebase
Tools & Platforms: Git, GitHub Actions (CI/CD), Docker, Azure, Google Cloud, PostgreSQL, Microsoft SQL Server, MySQL, SQLite, IIS, REST APIs, GNU/Linux, VirtualBox
Security: secure deployment (HTTPS, reverse proxy), end-to-end encryption, log and packet analysis; Wireshark, Nmap, Burp Suite, Metasploit, Kali Linux
Certificates: TryHackMe Pre Security, TryHackMe Cyber Security 101
