

# Viransh Shah

B.A.Sc. Computer Science — McMaster University 2026

📞 416-475-6838 ✉️ [shahv47@mcmaster.ca](mailto:shahv47@mcmaster.ca) 💻 [linkedin.com/viranshshah](https://www.linkedin.com/viranshshah) 🐙 [github.com/shahviransh](https://github.com/shahviransh)

## Summary

- Hacker-minded full-stack developer who builds product and breaks it: I ship production web and desktop software end to end, then bring real security instincts to make it hold up under attack.
- Recent McMaster Computer Science graduate (June 2026) with 12 months of co-op owning features end to end at a federal agency, shipping cross-platform apps to production for government scientists.
- Security credibility that's earned, not claimed: 2nd nationally at CyberSci 2025, founding executive of McMaster's cyber society, and applied cryptography (AES-256-GCM, ECDH) shipped into a live product.

## Education

### McMaster University

Graduation June 2026

*Bachelor of Applied Science in Computer Science, Minor in Statistics*

*Hamilton, Ontario*

- Dean's Honours List (GPA: 3.7 / 4.0). Top grades (A+) in Information Security, Computer Networks & Security, Databases, and Data Structures & Algorithms.

## Experience

### Environment and Climate Change Canada & Canada Water Agency

Sept 2024 – Aug 2025

*Full Stack Developer - IMWEBs Viewer & Nutri View*

*Burlington, Ontario & North York, Ontario*

- Sole developer of the IMWEBs Viewer/Nutri View from prototype to production: a cross-platform desktop and web app (Vue.js, Tauri, Flask) that gave federal scientists self-serve access to watershed data and replaced a slow, expert-dependent analysis workflow.
- Cut analyst data prep from hours of manual work to zero by building pipelines that auto-converted Excel BMPs and water quality data into SQLite and merged shapefiles/rasters into GeoPackages.
- Took the app to production myself on Azure VMs over HTTPS behind an IIS reverse proxy, and shipped signed Windows, macOS, and Linux builds from one codebase ([ECCC-IMWEBs-Viewer](#), [Nutri-View](#)).

### McMaster Cyber Society

Sept 2023 – June 2025 (MCP), July 2025 – Present (MCS)

*Founding Executive Member*

*Hamilton, Ontario*

- Placed **2nd nationally** as MacHackers in **CyberSci 2025**, representing McMaster against top Canadian university teams ([photo](#)).
- Competed in CTFs across cryptography, reverse engineering, and binary exploitation using Kali Linux, Nmap, Metasploit, and Wireshark.
- Sharpened incident response, log analysis, password cracking, and attack-chain analysis through TryHackMe, Advent of Cyber, and CyberStart Canada.

### McMaster University

Jan–Apr 2024; Sep–Dec 2025; Jan–Apr 2026

*Teaching Assistant - SFWRENG 2C03, SFWRENG 2XC3 & COMPSCI 1XD3*

*Hamilton, Ontario*

- Led labs and tutorials for 100+ students across three terms on algorithms, data structures, and software development in Linux, Git, C, and web stacks (HTML/CSS/JavaScript/PHP).

## Projects

### Slicc | *Bill Splitting and Restaurant Recommendation App* | [GitHub](#)

Sept 2025 – Apr 2026

- Architected and built the app's end-to-end encryption myself: **AES-256-GCM with ECDH P-256 key exchange**, so message contents stay private to participants and are never readable by the server or Firebase backend, even if the backend is compromised.
- Shipped the full cross-platform mobile app (React Native, Expo, TypeScript on Firebase) and released it to Android, owning the build from architecture through delivery in a 7-person Agile team where I drove code reviews and testing.
- Built a When2Meet-style group scheduler inside the chat that surfaces shared free times across members, plus event creation and expense-splitting features.

## Technical Skills

---

**Languages:** Python, TypeScript, JavaScript, Java, C, SQL, PHP, Bash, PowerShell, HTML/CSS, LaTeX

**Frameworks & Libraries:** Vue.js, React Native, Expo, Flask, Tailwind CSS, Electron, Tauri

**Tools & Platforms:** Git, GitHub, Docker, Azure, Google Cloud, SQLite, VirtualBox, GNU/Linux, IIS

**Certificates:** [Hackfinity Certificate of Completion](#), [Pre Security Certificate of Completion](#), [Cyber Security 101 Certificate of Completion](#)
