Highlights of Qualifications

- New graduate (June 2026), with 12 months of federal software co-op experience, A+ standing in Information Security and Computer Networks & Security, 3rd at CyberSci Regional Finals 2025 and 2nd in Toronto, and hands-on practice working alerts, logs, and network traffic on Windows and Linux hosts.

Education

McMaster University

Sept 2021 – June 2026

Bachelor of Applied Science in Computer Science, Minor in Statistics

Hamilton, Ontario

- Dean's Honours List (GPA 3.7 / 4.0); A+ in Information Security, Computer Networks & Security, Databases and Algorithms.

Experience

Environment and Climate Change Canada & Canada Water Agency

Sept 2024 – Aug 2025

Full Stack Developer - IMWEBs Viewer & Nutri View

Burlington & North York, Ontario

- Sole developer of the IMWEBs Viewer/Nutri View from prototype to production: a cross-platform desktop and web app (Vue.js, Tauri, Flask) giving federal scientists self-serve access to watershed data through interactive tables, graphs, and maps.
- Cut analyst data prep from hours of manual work to zero with pipelines that converted Excel and water quality data into SQLite and merged shapefiles/rasters into GeoPackages.
- Built Flask REST APIs, shipped signed Windows, macOS, and Linux builds from one codebase via GitHub Actions, and deployed on Azure VMs through IIS over HTTPS ([ECCC-IMWEBs-Viewer](#), [Nutri-View](#)).

McMaster Cyber Society

Sept 2023 – Present

Founding Executive Member

Hamilton, Ontario

- Placed **3rd** as MacHackers at **CyberSci Regional Finals 2025** and **2nd** in Toronto against top Canadian university teams ([photo](#)).
- Competed in CTFs across cryptography, web exploitation, forensics, and binary exploitation with Kali Linux, Nmap, Metasploit, and Wireshark, plus Advent of Cyber and CyberStart Canada.

McMaster University

Jan–Apr 2024; Sep–Dec 2025; Jan–Apr 2026

Teaching Assistant - SFWRENG 2C03, 2XC3 & COMPSCI 1XD3

Hamilton, Ontario

- Led labs and tutorials for 100+ students over three terms on algorithms, data structures, and development in Linux, Git, C, and web stacks.

Security Training (TryHackMe)

Pre Security and Cyber Security 101 paths | 65+ rooms | Certificates: [Pre Security](#), [Cyber Security 101](#)

2025

- Defensive fundamentals: working an alert end to end, the NIST incident response lifecycle, digital forensics, log review, and where SIEM, IDS, firewall, and vulnerability scanning tools fit.
- Labs in network and email protocol analysis (Wireshark, tcpdump, Nmap), Windows, Linux, and Active Directory investigation, and attacker tooling (OWASP Top 10, Burp Suite, Metasploit).

Projects

Slicc | *Bill Splitting and Restaurant Recommendation App* | [GitHub](#)

Sept 2025 – Apr 2026

- Cross-platform mobile app (React Native, Expo, TypeScript, Firebase) built by a 7-person Agile capstone team for group chat, scheduling, and expense splitting; architected **libsodium/NaCl end-to-end encryption** so messages stay readable only to participants, never to the server or Firebase backend.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, C, SQL, PHP, Bash, PowerShell, HTML/CSS

Security: incident response (NIST lifecycle), log and packet analysis, Windows Event Log and Linux syslog, SIEM and EDR concepts, email header analysis, TCP/IP networking, Active Directory

Security Tools: Wireshark, tcpdump, Nmap, CyberChef, Burp Suite, Metasploit, John the Ripper, Hydra, Gobuster, SQLMap, Kali Linux

Frameworks & Platforms: Vue.js, React Native, Flask, Tauri, Git, GitHub Actions, Docker, Azure, PostgreSQL, Microsoft SQL Server, MySQL, IIS, GNU/Linux
