Education

McMaster University

Bachelor of Applied Science in Computer Science, Minor in Statistics

Graduation June 2026

Hamilton, Ontario

- Dean's Honours List: Maintained a GPA of 3.5 or higher (GPA: 3.7 / 4.0)

Experience

Environment and Climate Change Canada & Canada Water Agency

Sept 2024 – Aug 2025

Full Stack Developer - IMWEBs Viewer & Nutri View

Burlington, Ontario & North York, Ontario

- Developed and extended the IMWEBs Viewer/Nutri View, a cross-platform desktop and web application for visualizing watershed and environmental data through interactive tables, graphs, and maps using Vue.js, Tauri, and Python Flask.
- Built data ingestion and conversion workflows for Excel-based BMPs, performance measures, and water quality data into SQLite, and integrated shapefiles and rasters into GeoPackages.
- Packaged the application for Windows, macOS, and Linux, deployed services on Windows and Azure VMs via IIS over HTTPS with a reverse proxy to Flask, and authored detailed technical documentation.
- GitHub: [ECCC-IMWEBs-Viewer](#) and [Nutri-View](#).

McMaster University

Jan–Apr 2024; Sep–Dec 2025; Jan–Apr 2026

Teaching Assistant - SFWRENG 2C03, SFWRENG 2XC3 & COMPSCI 1XD3

Hamilton, Ontario

- Led tutorials and 2-hour in-person labs on algorithms, data structures, and software development fundamentals across three terms.
- Supported students through lab exercises, assignments, and team projects with hands-on practice in Linux, Git, GitHub, and C programming.
- Guided students in COMPSCI 1XD3 to build and deploy websites using HTML, CSS, JavaScript, and PHP.
- Evaluated assignments, midterms, and final exams using grading rubrics and provided constructive feedback.

McMaster Cyber Society

Sept 2023 – June 2025 (MCP), July 2025 – Present (MCS)

Founding Executive Member

Hamilton, Ontario

- Competed in CTFs using Kali Linux, Nmap, Metasploit, and Wireshark for cybersecurity, cryptography, and reverse engineering challenges.
- Secured 2nd place as MacHackers Team in CyberSci 2025, representing McMaster ([photo](#)).
- Developed skills in incident response, log analysis, password cracking, binary exploitation, and attack chain analysis through TryHackMe, Advent of Cyber, and CyberStart Canada.

Projects

Slicc | *Bill Splitting and Restaurant Recommendation App* | [GitHub](#)

Sept 2025 – Apr 2026

- Cross-platform mobile app built with React Native, Expo, and TypeScript on Firebase (Firestore, Realtime Database, and Storage); currently usable on Android via APK.
- Implemented end-to-end encrypted group chat using AES-256-GCM with ECDH P-256 key exchange, and built the group scheduler and event creation features.
- Contributed to expense splitting workflows and collaborated in a 7-person Agile capstone team with iterative code reviews and continuous testing.

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, C, SQL, PHP, Bash, PowerShell, HTML/CSS, LaTeX

Frameworks & Libraries: Vue.js, React Native, Expo, Flask, Tailwind CSS, Electron, Tauri

Tools & Platforms: Git, GitHub, Docker, Azure, Google Cloud, SQLite, VirtualBox, GNU/Linux, IIS

Certificates: [Hackfinity Certificate of Completion](#), [Pre Security Certificate of Completion](#), [Cyber Security 101 Certificate of Completion](#)
